38,000,000 BTU Frac Water Heater Unit

Frac Water Heater

Our 38,000,000 BTU frac water heaters are dual fired – diesel or natural gas – trailer mounted, fully enclosed units. These units are capable of heating water up to 38°C (100°F) in a single pass at a flow rate of 500GPM, with a maximum flow rate of 850GPM at 50 psi (inlet pressure). The dual burners included on each unit meet all NFPA combustion system requirements and are equipped with safety shutdowns. Burners are digitally controlled to ensure adequate water temperatures are being achieved.
